

Presentations by students

Project: Game Based Structural Debriefing

PIs: Oleg Pavlov and Yoon Jeon Kim

Talking points for your presentation

- What animals were included in your ecosystem?
- Which ones were producers, primary consumers and secondary consumers?
- How did introducing or adding a new organism to the ecosystem affect other species?
- How is your connection circle is a representation of the ecosystem?
- If you removed something from the circle, what would be the affect on the other species?
- What reinforcing and balancing loops occurred in your ecosystem?
